Our Enzymes

Enzymes are biodegradable catalysts that provide green solutions to some of the problems presented by the oil industry.

Barcelona includes in its product portfolio solutions specially designed to solve some of the situations derived from the activity of this industry:

Product	Description
BD BIOENZYM HC-01	Enzymatic solution that degrades toxic components spilled in the soil. Its application in the contaminated area reduces a wide range of harmful compounds for the soil and its subsequent use.
BD BIOENZYM HCw-01	Enzymatic solution in crude oil spills in aqueous media. Helps the total elimination of those compounds that could not be removed with traditional mechanisms.
BD BIOENZYM DPG	Range of enzymes that degrade polysaccharides used for Enhanced Oil Recovery (EOR) methods, thus helping to eliminate these compounds in the recovered crude oil and making them ready for subsequent refining stages.
